

## VRPconnector Wordpress Installation Document

This document outlines the requirements, steps and deliverables included in a VRPconnector Installation. Customers integrating the VRPconnector have three installation options to choose from. DIY, Supported and Basic Installation. In addition to these options, Gueststream also offers Website Hosting, Email and SSL Certificates for additional fees.

VRPconnector Plugin can be found in the Wordpress directory at:  
<https://wordpress.org/plugins/vrpconnector/>

The VRPconnector currently supports connections to the most popular Property Management Systems.

### Option 2 – Supported

In the Supported option, you or your Wordpress developer will deploy Gueststream's VRP/VRPconnector technology to bridge the gap between your website and your Property Management Software. This option requires the purchase of a 10-Hour Support block that is used for any support needed to get the system up and running. This can include as little or as much help as needed and any remaining time on the support block can be used for future assistance after the installation is completed. These general steps apply to the process:

1. Sign up for our Free 30-Day trial subscription at [secure.gueststream.com](https://secure.gueststream.com) or by contacting Gueststream by phone
2. Contact Gueststream to set up and purchase a 10-Hour support block
3. Provide Wordpress Administrative Access and server access to Gueststream
4. Notify your PMS provider to release your data access credentials to Gueststream, Inc. to act as your "Web Company"
5. Gueststream will receive and test credentials, import and test data integrity, and issue you or your developer an API Key for the VRPconnector Plugin
6. Developer is then responsible to deploy the system and display unit information and the booking process as desired. This includes the design and branding of; search results, unit pages and the booking process

**Requirements:** Wordpress Website, Hosting, SSL, Wordpress Administrative Access, Server Access

**Gueststream Deliverables:** PMS connectivity, VRPconnector API Key, 10-hour technical support via support ticket system using [support@gueststream.com](mailto:support@gueststream.com) assistance as needed

**Cost:** 10-Hour Support Block - \$1,000 (in addition to the \$199 monthly subscription)
