

VRPconnector Wordpress Installation Document

This document outlines the requirements, steps and deliverables included in a VRPconnector Installation. Customers integrating the VRPconnector have three installation options to choose from. DIY, Supported and Basic Installation. In addition to these options, Gueststream also offers Website Hosting, Email and SSL Certificates for additional fees.

VRPconnector Plugin can be found in the Wordpress directory at:
<https://wordpress.org/plugins/vrpconnector/>

The VRPconnector currently supports connections to the most popular Property Management Systems.

Option 3 - Basic Installation

In the Full Installation option, you or your Wordpress developer will provide access to a completed or nearly completed Wordpress website. Gueststream will install the system and then return the completed website back to you. These general steps apply to the process:

1. Sign up for our Free 30-Day trial subscription at secure.gueststream.com or by contacting Gueststream by phone
2. Contact Gueststream to set up and purchase a VRPconnector Installation
3. Provide Wordpress Administrative Access and Server Access to Gueststream
4. Notify your PMS provider to release your data access credentials to Gueststream, Inc. to act as your "Web Company"
5. Gueststream will make an exact copy of your website. Once this step occurs, no changes can be made to the website until the installation process is completed and the website is returned to you
6. Gueststream will receive and test credentials, import and test data integrity, and input your API Key for the VRPconnector Plugin
7. Gueststream will deploy the system by installing the quicksearch box and match the CSS, design and branding of; search results, unit pages and the booking process. This work is performed after a telephone consultation with you to discuss your design and layout preferences. Options are presented during this initial call

Requirements: Wordpress Website, Hosting, SSL, Wordpress Administrative Access, Server Access

Gueststream Deliverables: PMS connectivity, VRPconnector API Key, complete system installation, including search testing and at least one successful test booking. Website Hosting and SSL installation can be added to the Full Installation option for additional fees.

Cost: \$2,000 (in addition to the \$199 monthly subscription)
